Project Name	Health360: Comprehensive Healthcare Risk & Disease Analytics
Maximum Marks	2 Marks

Customer Problem Statement Template:

The following statements describe the challenges faced by healthcare professionals who need to interpret patient information and make timely, evidence-informed decisions.

PS-1 : Clinical risk Assessment

I am	Describe customer with 3-4 key characteristics-who are they?	A clinical risk assessment officer
I'm trying to	List their outcome or "job" the care about-what are they trying to achieve?	identify patients who may need early attention for heart disease, diabetes or stroke
but	Describe what problems or barriers stand in the way-what bothers them most?	reviewing several health indicators for each patient takes time and makes warning patterns easy to overlook
because	Enter the "root cause" of why the problem or barrier exists-what needs to be solved	information such as blood pressure, glucose, cholesterol and BMI is difficult to compare quickly across many records
which makes me feel	Describe the emotions from the customer's point of view-how does it impact them	concerned that an important risk signal may be missed or acted on too late

PS- 2 : Population and lifestyle analysis

I am	Describe customer with 3-4 key characteristics-who are they?	A healthcare data analyst
I'm trying to	List their outcome or "job" the care about-what are they trying to achieve?	understand how age, BMI, exercise, smoking and alcohol consumption relate to chronic disease patterns
but	Describe what problems or barriers stand in the way-what bothers them most?	it is difficult to spot meaningful differences between patient groups by looking at raw records
because	Enter the "root cause" of why the problem or barrier exists-what needs to be solved	the data covers many demographic, lifestyle and clinical factors that need to be viewed together
which makes me feel	Describe the emotions from the customer's point of view-how does it impact them emotionally?	uncertain about which trends deserve attention and how to communicate them clearly to the healthcare team

Example:

I am	I'm trying to	But	Because	Which makes me feel
Healthcare data analyst	Identify health risk patients	Hard to review	Raw data available and all factor to compare	concerned

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Clinical risk officer	Identify high-risk patients early	Multiple indicators are hard to review quickly	Patient information is spread across several measures	Concerned about delayed action
PS-2	Healthcare data analyst	Find lifestyle and disease patterns	Raw records obscure group differences	Many factors must be compared together	Unsure which trends to prioritize
